

AIR DISINFECTION BY UV-c RAYS

## Hospitality Industry

Scarecrow is the 100% safe instant air disinfection and purification machine.

### Why use UV-c disinfection?

|

UV-c disinfection is totally safe thanks to Scarecrow's unique technology. It disinfects their by neutralising bacteria and inactivating viruses and pathogens in any enclosed room. This generates a constant purification of the air, following the recommendations of the Ministry of Health. Scarecrow ensures a clean and purified environment in enclosed rooms and spaces where everyone can continue to carry out all types of activities. It is an ideal solution for hotels, restaurants and cafes. With an advanced forced ventilation system, it hides ultraviolet radiation, guaranteeing the absolute safety of the people living in the area to be disinfected. With Scarecrow, you guarantee and provide a clean and safe environment for your customers.

### UV-c Cleaning Features

|

- + The UV-c disinfection system uses ultraviolet radiation to **eliminate the harmful agents in the environment.**
- + It neutralizes pathogens (germs) present.
- + The Scarecrow also includes **activated carbon filters and HEPA H13** filters to purify the air from other types of particles such as dust and pollen.
- + Unlike other chemical sanitizing methods, UV-c radiation provides fast and **efficient inactivation of all types of microorganisms harmful to humans.**
- + The great improvement in our disinfection towers is that **they do not generate direct exposure to UV-c rays** when sanitizing. Ultraviolet rays are harmful to human sight and skin; however, our ventilation and air circulation system eliminates any danger to the room's inhabitants.
- + Thanks to this circuit Scarecrow is able to disinfect an inhabited area where any kind of activity take place; shops, offices, hotels, restaurants or homes. Our forced ventilation and recirculation system neutralizes all the pathogens in air suspension, **purifying and disinfecting the air constantly in a 100% safe way.**
